

Reptile and Amphibian Ecology International invites you to join us for:

AMAZON RAINFOREST WILDLIFE PHOTOGRAPHY WORKSHOPS

Join us for a unique experience photographing the creatures of the Amazon Rainforest in Ecuador. Learn about how the art and science of photography can inspire and inform the world about the value of animals and ecosystems.

- Length: 10 Days
- Instructor: Paul S. Hamilton, Ph.D.
- Levels: Intermediate to Professional
- Subjects: Frogs, Insects, Lizards, Snakes, and More
- Location: Amazon Rainforest of Ecuador
- Maximum Enrollment: 6

Our macro photography workshops travel to remote jungles to document snakes, lizards, frogs, insects, along with other fauna.

Our study sites are among the most biodiverse spots on earth, and new species are continually discovered. You will see and capture the images of dozens of species in a single night.

100% of net proceeds support our nonprofit organization

Expeditions are led by Dr. Paul S. Hamilton, a scientist-photographer who has spent the last 15 years investigating rainforest biodiversity as well as the science and art

of photography. His works are displayed in dozens of publications, news outlets, web sites, and in the homes of over 100 clients.

REPTILE & AMPHIBIAN ECOLOGY INTERNATIONAL

Discovering, documenting, and saving the diversity of life.
